

UHID :

Patient ID : ASL-30394

Name : **Mr.PALANISAMY**

Age : 65 Yrs Sex : Male

Doctor :

Ref.By : The Maatram Rehabilitation Centre

S ID : 154756/2025

Drawn : 17-10-25 10:26

Received : 17-10-25 10:36

Reported : 17-10-25 11:35

LABORATORY INVESTIGATION REPORT

SPECIMEN	INVESTIGATION (METHOD)	RESULT	UNIT	REF. INTERVAL
BIOCHEMISTRY				
Plasma	Glucose (R) (Hexokinase)	**118**	mg/dl	70 to 140
EDTA W. Blood	HbA1c (HPLC)	**5.7**	%	Non Diabetic : <5.6 Pre-Diabetic : 5.7 to 6.4 Diabetic : >6.5

HbA1c is measured based on ion exchange chromatography, a technique which separates all the fractions of hemoglobin. According to WHO and AMERICAN DIABETES ASSOCIATION (ADA), HbA1c is considered as a single most diagnostic criterion for diabetes mellitus. It aids in identifying persons who are at the risk of developing diabetes mellitus. This glycated hemoglobin (HbA1c) represents integrated values for glucose over the preceding 8 – 12 weeks, which provides a retrospective index of integrated plasma glucose values. As the formation of HbA1c is irreversible, it is a firmly established index of monitoring diabetes mellitus. It is used as a measure of risk of development of micro vascular complications of diabetes mellitus.

EDTA W. Blood	EAG (Estimated Average Glucose) (Calculation)	**116.89**	mg/dl	70 to 140
Lipid Profile				
Serum	Cholesterol (Colorimetric - Cholesterol Oxidase)	***104***	mg/dl	Desirable : <200 Borderline : 200 to 239 High : ≥240
Serum	Triglycerides (Enzymztic/GPO Trinder)	**69**	mg/dl	Less than150
Serum	HDL Cholesterol (Homogeneous Colorimetric)	***28***	mg/dl	Low : <40.0 Normal : 40.0 to 60.0 High : >60.0
Serum	LDL Cholesterol	**62.2**	mg/dl	Optimal : <100.0 Near Optimal : 100.0 to 129.0 Borderline : 130.0 to 159.0 High Risk : 160.0 to 190.0 Very High Risk : >190.0
Serum	Non-HDL Cholesterol	***76***	mg/dl

LABORATORY INVESTIGATION REPORT

SPECIMEN	INVESTIGATION (METHOD)	RESULT	UNIT	REF. INTERVAL
				Optimal : <130 Desirable : 130 to 159 Borderline : 160 to 189 High : 190 to 220 Very High : >=220
Serum	VLDL Cholesterol (Calculation)	**13.8**	mg/dl	Less than28.0
Serum	T.Cho/ HDL Ratio (Calculation)	**3.71**		3.90 to 5.00
	LDL/ HDL Ratio (Calculation)	**2.22**		1.00 to 3.00

All tests are issued after validation
